### ARMISTICE DANCE

The scene is set and everything practically in readiness for the Annual Re-Union and Dance of the Legion, their friends and supporters, on Wednesday, November 11, in the U.F.A. Hall.

A large crowd is expected and the U.F.W.A. will purvey the Midnight Lunch, that in itself should be an attraction, as these Ladies have the reputation for doing things in good style.

Drum Major Borbridge, of the 1st Battalion of the Gloomchasers, states, his Platoon has been greatly strengthened by the addition of two new recruits, Jack and George Fleming. These lads will handle the brass section in the orchestra and this augmentation to the Gloomchasers should prove a decided feature and drawing card for those who like dancing. Don't

### OUR VILLAGE

The Council held their usual monthly meeting Monday night, November 2. Matters of a purely routine nature were attended to. Several applications for the care-taking or renting of the Skating Rink were received. These were tabled for further consideration and investigation.

Stop Signs have been placed by the Council at Osler, Hammond and Nanton Streets, where they join Railway Avenue, and drivers of Vehicular Traffic, are asked to take this in mind and obey them implicitly. They are there for your protection, Mr. DRIVER, as much as anyone else, so Drive carefully. Obey the signs and avoid accidents

forget, come out and meet Jack and George, also the old stalwarts, Ken, Tom, Ken and Don, they give you the May West invitation, "Come up and see us sometime," but make the sometime, November 11, at 9 p.m.

### PREPARE FOR WINTER.....

Be cosy in your home this winter. It may be a long one--and a COLD ONE!

At extremely low cost you can equip your home with STORM DOORS and STORM SASH.

PLACE YOUR ORDER WITH US NOW.

### Canadian Corps Alberta Division Entertain Legion

Wednesday, October 28, was real Legion night, as on this occasion the Canadian Corps in Alberta of Calgary, provided the programme, serving up in real Army style the entertainment of the Great War Days. It was a real evening, and those who attended voted it worth while.

The first turn of the evening was a Skit played in a Dug-Out, the second, a scene played in an "Estaminet". Both were cleverly done, and evoked much applause and merriment.

Those taking part were, Mrs. A. L. Campbell, as Mademoiselle, and Messrs. Huff, Staag, Campbell, Branton, Peckover, Crumblehume, Rusk and Francois.

The third and last act was one of these good old Hokus Pokus go as you please skits called, "The Cat's Pyjamas" or the "Kitten Teddies" (oo, pardon us "The Royal Flush") and for sheer unadulterated fun, it took the biscuit, in fact, many of the gentler sex in the audience almost went into convulsions with laughter. This was presented by Messrs. Riordan, Duncan, Huff, Cooper, Pollard, Lanhan and Appleton, all members of the third Division Concert Party.

It was so well enjoyed that the saying around, goes something like this: "We would not have missed it for anything, when are we going to have another."

Unfortunately, some of the members of the Orchestra missed the transport, and in consequence, the Orchestra was not at full strength. Mrs. R. T. Amery kindly came to the rescue and acted as Pianist for the evening.

After supper was served, a sociable dance was enjoyed for about an hour, and all left feeling that the time had been well spent.

The Legion and Secretary May, are to be congratulated for their efforts in providing the Crossfield Public with this entertaining Concert Party, and probably at some future date, we may have the pleasure of hearing the Canadian Corps once again!

### THE WORLD OF WHEAT.

By H. G. L. STRANGE

Canadian wheat is seldom used abroad as the main ingredient in making a loaf of bread.

The European loaf generally is made from native wheats. Such bread is nutritious, of good flavour, but is not very palatable; the loaf is small and heavy, not very attractive nor appetizing.

When, however, as little as fifteen percent of "Manitobas" is mixed with native wheats an almost magical change takes place; the loaf now becomes large, attractive, rather moist, of even silky texture with a crumb that is elastic and of a very light cream colour; it has a nutty flavour, is palatable and also has a thin good golden-brown crust.

European people like this improved bread when they can obtain it and when they can afford it.

It is the inherent quality found in good Canadian varieties, and in a few other wheats, called "strength" - meaning quantity and quality of gluten - that is capable of bringing about this decided improvement in the European loaf.

Canadian wheat today is the "strongest" wheat in commerce. This is the only reason why foreign millers require it. It seems, therefore, that we must continually strive to maintain this superior "strength", or "quality" in our wheat if the world is to continue to "want" it.

### Dramatic Society Social Evening Masonic Hall

A jolly sociable evening was held last Friday at the Masonic Hall, when the Crossfield Dramatic Society entertained at a Pirate Frolic.

Unfortunately, everyone could not be there, as each member was only permitted to invite one guest, but it is hoped, at some other gathering, that others will be present.

Many varied costumes were on display, so much so, that old King Neptune, when he boarded the "Jolly Roger," had quite a task to determine the two best dressed Pirates. After some deliberation, the prizes were awarded to Miss T. Grant, Calgary, and Mr. K. McCrae, Crossfield.

Dancing and contests made up the evening, and at 11 p.m., all sat down to real ships fare. The way that the dishes were emptied speaks well for the Ship's Cook, Monsieur S. McCloud, as well as those in charge of the evening, Mrs. H. A. Bannister, Miss E. McTavish and Messrs. L. Lounan and E. Tweedale.

All voted it a good time even though some were rather sceptic of the human frog.

Contest winners were, Mrs. K. J. Borbridge, Miss M. Ingham, Mr. T. Mair and K. McCrae.

### REMEMBRANCE DAY CHURCH SERVICES

Veterans are asked to assemble at the Masonic Hall, not later than 10 a.m., Wednesday morning.

Parade led by the band, will leave the Hall at 10:10 a.m. sharp, and march to the United Church.

The public are asked to be in their places in the church, by at least 10:18, so that the services can start as scheduled, namely, 10:20. Legion members will please wear Medals and Decorations.

Let us all go to the service, November 11.

### PROCLAMATION

Wednesday November 11, (Remembrance Day) has been proclaimed a Civic Holiday. All places of business will remain closed.

This includes Barber Shops. Citizens will govern themselves accordingly.

Passed by the Village Council.  
Wm. J. WOOD, Mayor

### DIDSBURY TRUCK TURNS OVER NEAR CALGARY

Milt Traxell, driver of a Caithness Cartage Truck, Didsbury, attempted, while driving, to cover some goods, which were beside him on the seat, with a coat. His actions caused him to find himself steering into the ditch. Endeavouring to swing back, the truck turned on its side, scattering goods all over the highway.

Archie Weber and Jim McCulloch, coming from Calgary on Jim's truck, with the aid of others helped to upright the truck, and re-load the goods spilled.

Milt was not seriously hurt, although the fender and radiator of the truck were badly bent.

### ADVERTISERS ATTENTION

Next Press Day will be November 11, and as this date is a public holiday, Advertising matter should be in our hands by 12 noon, Tuesday, November 10.

Thank you for your co-operation.

### COMING EVENTS:

East Community Hard Time Dance on Friday, November 6.

Auction Sale of R. M. McCool on Saturday, November 7.

Social Credit Social evening, (today) November 5.

### O'NEIL NOTES

The scholars and people of the district were entertained at a lively Halloween party, Thursday night, in the O'Neil School.

Shouts of merriment proclaimed the enjoyment of all, during the contests and games.

Prizes were awarded to the following who competed in single competitions.

Apple Eating Contest: Norman O'Neil, Don O'Neil.

Obstacle Broom-Stick Race (unfolding): Gordon O'Neil, Harry Wigle, Don O'Neil.

The entire crowd enjoyed various other games, especially when they visited: "The Witches' Bowling Alley," "The Cross Bones and Skull Target Match," "Halloween Basket Ball," and "Peanut Race," etc.

Lunch was served by the ladies of the district. Dancing followed.

### DOG POUND NOTES

From Our Own Correspondent

Mr. C. McKenzie, of Dog Pound, returned home from Calgary, last Saturday.

Mr. M. Elliott, of Dog Pound, is back home after spending some time in the Calgary Hospital.

The Girls' Club sponsored a social evening which was held in the Dog Pound Hall, October 31. A gathering of fifty young people attended, and reported, having spent a very enjoyable evening.

Remember the several doings on Armistice Day.

Mrs. Smart and Don Fleming are to be thanked for supplying the music.

After a vote of thanks to their hostess, Miss Marion Ingham, the crowd dispersed.

#### The Wheat Problem

What to do about wheat is the greatest problem facing the Western Canadian farmer, not only for the immediate present, but for the long range future. Should he grow more, or should he grow less, or perchance, should he forget about wheat and turn his attention to other crops and other activities?

It is safe to say that this problem causes more sleepless nights on the Western Canadian prairie than anything else. It is probably not far from the truth to say that the question is uppermost in the mind of the average tiller of the soil the greater part of his waking hours and that during the night it perturbs his slumbers.

The farmer seeking the solution of the problem can get plenty of data which has a bearing on the subject and a plethora of advice without going far afield for it, but unfortunately for him and for his peace of mind so many complications are involved in the answer to the question and so many so diverse and contradictory are the replies that the greater his research, the greater must be his confusion and the farther he is away from a conclusive solution.

To solve the problem with even a remote degree of assurance, the investigator must not only be in possession of an immense amount of current available information but he must also be something of a prophet. He must be able to peer into the crystal of the future and divine what is ahead.

As there are no infallible methods of determining the unknown factors of production and marketing he must make his guess as best he can and shape his course accordingly.

If he guesses right, he successfully runs the gamut of early and late frosts, grasshoppers, wire worms, cutworms, thistles and other noxious weeds, windstorms and hail, rust and other blight and pulls off a crop, he is faced with the possibility that it may be a drug on the market and that the reward of his labors may be little better than zero.

Added to all these and many other unrecorded uncertainties and handicaps comes a new threat to the existence of cereal farming as it is practiced on the prairies in the form of grain produced on an intensive scale under factory conditions and without the use of soil as a medium, a method discovered by two Englishmen after four and a half years of research and now being tested on a commercial basis.

To quote a Magazine Digest summary of an article appearing in the Sunday Express of London, "the inventors claim that under their scheme which they call 'cabinet culture', one acre of floor space is equal to 1,760 acres of grass land; sixpenny-worth of seed will grow 200 hundredweight of green fodder; one crop of fodder can be produced per day instead of one per year; a farmer feeding intensively cultivated corn instead of hay and grass to his livestock will save \$2.50 on every pig brought to bacon weight, \$5 on every bullock, and from 15 to 20 per cent. on milk production because they will be eating young, fresh food instead of old or dried grass which has been weakened of its vitamins."

"The inside of the cabinet contains rows of trays, each one with corn in a different stage of growth. To-day's tray holds seed. Yesterday's shows the white shoots. The shoots are larger and larger up to the tenth day when the fodder is full grown and ready to be taken out and eaten."

"There is no soil. On top of the cabinet is a tank full of water containing a small proportion of a chemical solution. The chemicals are those of which the soil consists. Enough solution to last a month costs \$3.75."

"In the bottom of the tank are small holes. For three minutes every 24 hours a tap is turned on and the tank drops 'rain' on to the top layer of trays. By the tenth day the growth can be lifted out of the tray like a grass-grown mat. The animals eat every scrap of it and the tray is left perfectly clean. There is no earth or dirt of any kind in the whole process."

"Animals fed on these intensive crops can be kept in yards or barns." It is reported the already offered are being made to establish an agency and import some of these "factory-farms" to Western Canada.

If the inventors' claims for this method of growing crops can be demonstrated as commercially feasible and economical no doubt the next step will be to improve the system to enable it to bring wheat to maturity, and if that can be done with success one wonders what will happen to the wide expanse of the prairie which constitute such a large portion of the prairie provinces and what will happen to the investment in capital and labor which the farmers have sunk in hundreds of thousands of acres.

There is just one consolation for the prairie farmer and that is the fact that the scheme has not been proven a commercial possibility. Quod erat demonstrandum.

#### Good Habit To Cultivate

##### Children Should Be Taught Kindness To Dumb Creatures

Victor Hugo says of that bishop whom all readers of "Les Misérables" will never forget, "he sprained his ankle once trying to avoid stepping on an ant." He belonged to the order of those who would not "needlessly set foot upon a worm." This attitude toward life, even when we meet it in its lowliest forms, can be cultivated in children if parents start early enough. If there are harmful creatures whose meaning we cannot understand and which must be destroyed, let the destruction be without unnecessary suffering and never in the spirit of cruelty.—Our Dumb Animals.

Peacock feathers are considered unlucky.

The Queen Mary has 528 electric motors to supply her power.

#### New Minister To Canada

##### Belgium Proposes Sending One In Addition To Consul

Belgium proposes to send a full-fledged minister to Canada, in addition to the present Belgian consul. Perhaps the Belgian government realizes that Canada is the most solid part of the British Empire, oceans on both sides, the Arctic on the north, the United States on the south, no near enemies, unlimited possibilities. The day may come, and probably will, when Canada will be the real British Empire, with London for its European headquarters.—Chicago Herald and Examiner.

Ancient Rome's famous Baths of Diocletian could accommodate 3,200 bathers at one time.

Westmoreland, England, is painting its telephone booths red.

#### Man With Dual Brain

##### Can Do Two Entirely Different Things At Once

There is a man in Sydney, N.S.W., who can do two entirely different things at once, and do them well. He is Stirling Wilkinson, known to his friends as the man with the "dual brain."

Among other accomplishments, he can write different words and sentences simultaneously with both hands. He can write the same word backwards. He can also do two separate drawings at the same time. As a bookkeeper he will be particularly skilled as he can make simultaneous entries—the figures with one hand and the items with the other.

Wilkinson says that he was born that way. As a child, he found that he was writing backwards with his left hand—to the discomfort of his teachers, who had to use a mirror to read his writing. Specialists who examined him, decided that he had a "dual brain." To induce correct writing with the right hand, they strapped his left arm to his body.

When he entered college, he jealously guarded his secret. After a time, he confided some misdeeds and was given 400 lines to write. By using both hands at once, he completed the task in half the time taken by the other boys. The astonished master accused him of having another boy to help him, and then Wilkinson had to explain his ability to do two things at once. After that his detention was double that of the other boys.

#### Home Improvement Plan

##### Unemployed Building Trades Workers Can Look About For Work

The government's new home improvement plan will give the unemployed building trades workers a chance to approach his problem of finding a job in an entirely new way. It was stated at the national employment commission.

The commission suggested out-of-work members of building trades unions can now look about them, find homes in need of repairs, estimate the cost of making improvements and tell the owner how much money he needs and how he can get it. In the case of farmers, there is nothing to prevent them borrowing money to buy materials and doing the work themselves.

Under the regulations, money will be loaned on the basis of character and income. A farmer who can fulfill these requirements to the satisfaction of his bank manager will be in a position to borrow money for the purchase of materials no matter whether he does the work himself or hires labor to do it. While the home improvement plan is basically designed to provide employment, the purchase of materials by the farmer, even if he does the work himself, is considered by the commission, accomplish this purpose.

#### Girl Pat Escapee

##### Skipper And His Brother Convicted In Old Bailey Court

George Osborne, skipper of the wandering trawler, Girl Pat, and his brother, James, were convicted in Old Bailey court in London of theft of the vessel. George was sentenced to 18 months in prison and James, formerly of Toronto, to 12 months. The Girl Pat put out from Grimsby by last April, ostensibly on a fishing expedition. She put in along the Spanish coast, at the Canary Islands, and in West Africa. She was next reported off French Guiana and finally was captured in June off British Guiana.

#### World's Dairy Congress

##### Will Be Held In Berlin, Germany, Next August

Canada will be officially represented at the 11th World's Dairy Congress to be held in Berlin, Germany, from August 22 to 28, 1937. This congress, which meets every three years, is the most important gathering of representatives of the dairy industry in the world. An international dairy exhibition will be held in connection with the congress, at which the very latest developments in the dairy industry throughout the world will be shown.

The London directory contains the names of about 250 dealers in cat-meat.

Pockets are better than a handbag. You aren't forever wondering where you left your pockets.

In Japan, amateur baseball games attract crowds of 50,000 persons.

Australia now has 700,000 automobiles in use.

#### Long Patrol Ends

##### Ship That Guides Navigation Through Northern Channels, Completes Work For Season

The N. B. McLean, mub-nosed ice-breaker, which guides navigation through channels leading to Canada's most northerly seaport of Churchill, slipped quietly into harbor at Quebec recently, completing her seasonal patrol of the northern seas.

For almost three and a half months she plowed the Hudson Straits, guiding 15 vessels through the narrows, to and from the Manitoba port. During that time she saw one wreck; saw the freighter Avon River, disabled in a gale, washed ashore. The storm, last September, raged for three days and the McLean stood by the helpless grain carrier 48 hours before attempting to rescue the crew and later place them aboard the steamship Furby.

From remote points in the north, the McLean brought back eight wireless operators, stationed for a year at their lonely outposts.

She also brought back Gabriel Bohan, 23-year-old hostessman from the Charles L.D., stricken by appendicitis as the French freighter made her way up the straits. The French seaman was brought aboard the McLean, and Dr. Fernand Lizotte performed an emergency operation in his cabin.

The patient was reported recovered and it was expected he would leave shortly for France.

At lonely Sugluk harbor, in the straits, the McLean put in to provide medical treatment for more than a score of Eskimos, stricken by influenza. Four of the group died before the vessel arrived, but Dr. Lizotte reported recovery of the others after medical treatment.

#### Relief Running Wild

##### Town In Eastern Ontario Has Great Heavily Reduced

Provincial relief grants to the town of Hawkesbury, in eastern Ontario, will be reduced nearly \$8,580, because investigation of relief administration had shown "another municipality squandering provincial funds on unneeded assistance," Welfare Minister Croft announced.

"The town seems to have been running wild in relief administration in the easy confidence we'd foot the bill," he said. "They're in for a job. Every mislaid cent will be charged back to their own taxpayers."

Some relief recipients were driving their own cars, the minister said. An investigator found people offering their own business on relief, offering unfair competition to rivals. Investigators found a number of instances where people closed out bank accounts to go on relief.

#### Roundup Of Reindeer

##### Thirty Thousand Reindeer To Be Earmarked In Alaska

A roundup of 30,000 reindeer, one of the largest in Alaskan history, was planned by a United States official.

For the purpose of slaughtering some, earmarking and caring for the health of others, great corrals will be built 50 miles inland from Point Barrow.

The deer will be counted and marked after they have been herded by the Eskimo from the Arctic plains for hundreds of miles around.

Instead of branding the reindeer, the Eskimo will mark yearlings and knives with various shaped alits and fawn nicks in the ears.

#### Presents Family Cradle

The cradle bought at Morley, Eng., 64 years ago for Herbert Henry Asquith, put in premier, who became Lord Oxford and Asquith, has been presented to Morley by Henry Asquith, one of three generations of the family who have used the cradle, his father and his own grandfather having been rocked in it. The gift has been accepted by the mayor.

What do they mean about "the good of days"? Well, the answer may be an item in the 25-year-old column of the Brantford Expositor: "The relief officer reported an outlay of \$24.72 during August."

#### World Jewish Problem

##### The Jewish Population Of Poland Is 3,500,000

The world Jewish problem took on new complications at Geneva with a Polish demand that the League of Nations find a home somewhere else for the Polish Jews.

M. Komarnicki, the Polish delegate, told the League assembly's political committee that while Palestine was the natural and principal home for the Jews, other places must be found as an asylum for the "immense reservoir of Jewish population inhabiting Central and Eastern Europe."

The Jewish population of Poland is 3,500,000.

The government moved at Jerusalem to end sabotage by arresting 36 Arabs and accusing 15 more of damaging the Iraq Petroleum Company pipeline. Brigades have in the past continually destroyed sections of the pipeline and fired the escaping oil.

#### SELECTED RECIPES

##### MAGIC CREAM COOKIES

2 eggs  
1 cup sugar  
1 cup thick cream  
2 cups flour  
1/2 cup shredded coconut  
3 teaspoons Magic Baking Powder  
1/2 teaspoon salt  
Beat eggs until light, add sugar gradually, add coconut, cream, and flour (which has been mixed and sifted with baking powder and salt). Put away in ice box until thoroughly chilled, then turn on to a floured board and roll one half inch thick. Sprinkle with coconut and roll one fourth inch thick, cut with a small cutter, first dipped in flour. Bake on a buttered sheet in a moderate oven.

#### Fighting Planes For Canada

##### Royal Canadian Air Force Receiving Equipment From England

The Royal Canadian Air Force now is receiving new equipment recently purchased in England at a total cost of more than \$500,000. Two of seven shark bombing planes have arrived and are now being assembled at the Rockcliffe airbase and the other five are on the way. These machines cost \$64,890 each.

The bombers might be said to be the first real war machines bought by Canada since the Great War. They are the latest type of fighting machine and similar to many purchased by the British government recently. With a maximum speed of 175 miles per hour they are capable of staying seven hours in the air.

In addition to the bombers 10 planes are being made for the force at Fort Erie, Ont., at a cost of about \$30,000 each. They will be used for training of beginners in the force.

#### Would Be An Asset

The Niagara Falls Review says there are two stenographers in a certain office. Both are experts, but one gets \$10 a week more than the other because she is proficient both in French and English. It is a pity that all Canadian children do not learn both languages at the earliest period, during school days.

January is the official birthday of all thoroughbred horses.

#### Cause Of Cataracts Unfound

##### Certain Food Extracts Said To Have Effect On Eye Malady

The cause of cataracts, which has baffled the medical world for centuries, was believed to be a step nearer solution with the discovery by Dr. Agnes Fay Morgan, chairman of the department of household science at the University of California; and Bessie B. Cook, a graduate student, that certain food extracts have a material effect on the eye malady.

In a report to the society for experimental biology, Dr. Morgan said her experiments showed that presence of lactose or galactose in the intestine, and frequent gastro-intestinal absorption difficulties associated with a deficiency of vitamin G offer a possible common attack on the problem.

In lactose and low vitamin G diet tests, there was a hundred per cent. incidence of cataract," the report said. "Likewise the lactose fed controls grew at about 60 per cent. of a group of cornstarch fed controls."

Dr. Morgan said the cause of cataracts is still unknown but that the determination of the cause has moved a step in advance in the possible future prevention of the disorder.

#### First Canadian Telegraph

##### Company Was Formed At Toronto Ninety Years Ago

Ninety years ago the first telegraph company in Canada was formed at Toronto and within a few days active construction upon the pioneer wire line between Toronto and Hamilton was commenced. In January the line was completed to Kingston. The same year the Montreal Telegraph Company established communication between Montreal and Toronto and, in 1852, purchased the initial Toronto company.

#### Transcontinental Air Route

Lieut.-Col. George A. Drew, Canadian military writer, told the Electric Club at Toronto that immediate establishment of a transcontinental air route is essential if Canada is to take its proper place in the world. Canada's best contribution to empire defence can be made through aviation, he said.

Complete opening of a rice flower has been known to take place in 30 seconds. The bloom lasts from two to three hours.

## NO CHANGE IN BRITISH POLICY SAYS BALDWIN

London.—Prime Minister Baldwin declared in the House of Commons that there had been some breaches of the Spanish non-intervention agreement on both sides, but they were not of sufficient importance to cause a change in British policy.

In his first appearance since his illness, the prime minister wound up the debate.

"The general impression the government has formed," he said, "is that there have been some breaches and arms have been sent to both sides. But they have not been sufficiently important to cause us to modify our policy in regard to non-intervention."

Mr. Baldwin then began to discuss Communism and Fascism.

"Thank God, as far as Britain is concerned, these two forces are not worth that!" he declared, snapping his fingers.

The difference between democracies and autocracies, he said, was that the former advertises its troubles to the world.

"Under authoritarianism," he added, "we have to guess their troubles. Our system is the healthier, notwithstanding incidents like the Sheffield controversy, where the differences were broadcast exaggeratedly in authoritarian states."

Attacking Communism, the prime minister said it will neither brook, realize, understand nor allow any fact that clashes with what it wants to believe. Moreover, he declared, it bred Fascism.

In the course of the debate, the Labor and Liberal spokesmen, Arthur Greenwood and Sir Archibald Sinclair, respectively, both demanded to know what was happening in the Balearic Islands where the Italians were said to be securing control.

Foreign Secretary Anthony Eden defended the Portuguese government against Russian charges of Spanish neutrality violation.

"Not a single one of the Soviet charges against the Portuguese government has been proved," he told the house.

"The chief complainant against the workings of the non-intervention agreement is Soviet Russia," Eden continued, "which charges Portugal with infringement."

"We have no information whatsoever to support the Soviet charges."

"Nor has the non-intervention committee been able to support any single one of the Soviet charges against the Portuguese government."

"There is no firm evidence available that the Portuguese government is breaching its agreement."

Eden asserted Britain would hold fast to the non-intervention pact despite opposition from Labor groups.

"Supplies sent from this country," he said, "would not have had an important bearing on the result in Spain."

"Turning to face Labor leaders who have pressed for direct aid, he declared:

"What you are asking is that the French and our own government, who worked all through the weeks of August and September to try to get the committee going, should destroy what has been done, and, when they had destroyed it, Soviet Russia would be left master of the field."

"The government has no intention of leading itself to anything of this kind. The mere fact that all nations still are members of the committee only shows that Europe believes this non-intervention policy is the right policy to pursue."

## More Recruits Needed

British Youths Must Be Given Military Training

London.—British youths between the ages of 14 and 18 years must be given military training, War Secretary Alfred Duff Cooper said at a luncheon here.

Attacking persons opposed to new British defence plans, he said they were obliged to admit their policy would involve forcing the country to give way before any stronger nation.

"The necessity of obtaining men," the war secretary said, "is, I think, the most urgent with which we are faced at the present time."

## Alberta By-Election

Edmonton.—By-election in the provincial constituency of Grouard was ordered in an Alberta writ which set the vote for Nov. 30. Nominations are to be held Nov. 20. By-election was necessitated by the death in September of L. A. Groux, K.C., Liberal member, who held the seat since 1924.

## Debt Conversion

Quebec House Passes Measure Sponsored By Provincial Treasurer

Quebec.—Conversion of part if not the entire debt of the province of Quebec was authorized in a measure sponsored by Provincial Treasurer Martin B. Fisher and adopted on division by the Quebec legislature.

The measure did not mean the government would immediately convert the provincial debt, Premier Maurice Duplessis said in explaining the bill. He said it gave the government power to do so if desired and at the same time enabled it to secure advantage of lower money rates.

The bill had a three-fold purpose, said the premier. The legislation first authorized the lieutenant-governor-in-council to change the form of any part of the existing public debt of the province by substituting one class of securities for another, provided the capital of the debt is not increased.

Provision was made, the premier asserted, that no such substitution could be effected without the consent of the holder or unless the security is redeemed by the government.

Under limits of the bill, loans are restricted to a term not exceeding 30 years, and an interest rate not exceeding four per cent.

## Defends Capitalistic System

Speaker Claims It Allows Greatest Opportunity For Human Progress

Saskatoon.—Spirited defence of the capitalistic system as allowing the greatest opportunity for human progress, a still higher standard of living and a greater measure of security, was made by H. C. Goud, chairman of the Montreal Stock Exchange, in a Canadian Club address here. He offered democracy, freedom of the individual from state control, a recognition by business leaders as well as employees of their respective rights and duties, and understanding as allowing the best measure of expansion.

"We cannot escape the conclusion that our system of government and political economy arose not because of any specific plan which men appreciated, but because it was the only system under which we could expand in accord with the economic necessity of a new country," Mr. Goud declared. "It has been demonstrated in many instances that free enterprise, operating under democratic institutions, is the only system capable of providing abundance."

"Any system which brought this state of misery and suffering in a degree which would shock the peoples of this country."

## How Wars Are Won

Does Not Think That Next War Will Be Fought In The Air

Chicago.—The next war, General Frank Parker, retired, predicted, "will begin in the mud and end in the mud, despite claims made by proponents of military aviation."

The general, who ended 46 years of United States army service last Sept. 30, was unimpressed by the theory that the next conflict would be fought in the air. He was unmoved by stories of death rays and virulent new poison gases.

"We who have studied military tactics know that wars are won by capturing and holding territory. For this purpose nothing has yet been devised to supersede infantry supported by artillery," he said.

## Unemployment In Alberta

Calgary.—For the week ended Oct. 24, the number of unemployed men and women in Alberta totalled 11,306, a new record, the Alberta government employment service reported. It was an increase of 32 per cent, as compared with the same week a year ago. Calgary had a total of 5,054 registered unemployed; Edmonton 4,462; and Lethbridge 465.

## Another Complaint Made

Seattle.—Frank Bell, United States fisheries commissioner, declared Japanese fishermen, working in sampans off Alaska big floating canneries, are threatening the existence of Alaska salmon. British Columbia fisheries authorities recently made similar complaints about Japanese operating at sea off the British Columbia coast.

## Valuable Wheat Shipments

Edmonton.—Officials of the Northern Alberta railways estimated here that 3,500,000 bushels of grain, mostly wheat and winter wheat, valued at \$2,500,000 had been marketed already this season by farmers in northern Alberta.

## ARE ACQUITTED OF VIOLATIONS OF AGREEMENT

London.—The international "hands-off-Spain" committee acquitted both Italy and Portugal of charges of violation of the non-intervention agreement despite strenuous Russian objections.

Three separate votes on the various charges were taken and in each case the "acquittal" was unanimous except for Russia's dissent.

The Earl of Plymouth, chairman of the committee, took the initiative before the body and said the charges against Italy that she had supplied arms and munitions to Spanish Fascists, either:

1. Referred to what happened before the agreement went into effect, or
2. Had not been proved; or
3. Were not violations.

The three votes were taken on: 1. Italy's reply to charges by Russia she had supplied war materials to the insurgents in Spain;

2. Charges by the Spanish government against Portugal that she had aided the insurgents;

3. Russian allegations charging both Portugal and Italy with sending in arms and munitions.

These developments within the committee in its lengthy sessions were disclosed in a communique.

The communique also disclosed the Portuguese representatives on the committee declined to accept Russia's proposal for control of Portuguese ports by naval vessels of one or more of the member nations of the committee.

Ivan Malaisky, Russian ambassador to London, told the committee Russia would combine its control proposal with a proposal made by Lord Plymouth for control of Spanish ports and frontiers to see the non-intervention agreement was observed.

"These proposals, the communique said, will be referred back by the various diplomats on the committee to their home governments."

German and Italian representatives insisted they were anxious to make the agreement effective and indicated their governments would approve, but they said the proposals must be studied.

## Rescuers Receive Money

Thousands Of Canadians Contributed To Moose River Fund

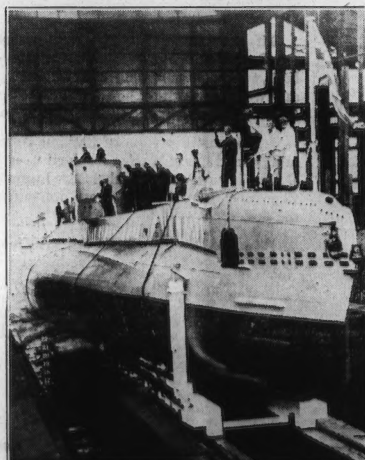

Toronto.—A total sum of \$78,544.44 has been distributed to Moose River miners who aided in the dramatic rescue of two trapped men last April. It was announced by Norman Sommerville, K.C., chairman of the Moose River rescue fund committee.

In a final statement of the committee's operations, Mr. Sommerville said thousands of persons in all parts of Canada contributed to the fund, administered without expense. He said 346 persons had been declared entitled to participate in the distribution.

## Recovering From Operation

London.—Obed Smith, formerly chief emigration commissioner for Canada in London, is recovering from two serious operations. He was reported doing well.

## BRITAIN LAUNCHES NEW SUBMARINE

Launching of H.M. Submarine "Sunfish" at the Chatham dockyard, where the naming ceremony was performed by Mrs. Skipwith, wife of Vice-Admiral H. M. d'E. Skipwith.

## HON. ARTHUR ROEBUCK

Attorney-General for Ontario, who has left for England to appear in the appeal being carried to the Privy Council by the Federal and some of the Provincial Governments on social legislation.

## Belgian Fascists

Want Belgium To Withdraw From League Of Nations

Brussels.—Belgian Fascists and Flemish Nationalists, opponents of Premier Paul Van Zeeland's government, demanded that Belgium announce its withdrawal from the League of Nations.

Their proposal came after a speech by Foreign Minister Paul Spaak which these groups contended was a recession from the "neutrality" policy recently pronounced by King Leopold.

Spaak described Belgium's new foreign policy as "complete independence without returning to our pre-war foundation of complete neutrality." It could not be adhered to, he asserted, unless parliament provided extraordinary appropriations for military expenses.

The Rexists, a Fascist organization headed by Leon Degrelle, called the "Hitler of Belgium" and the Flemish Nationalists, whose sympathies are strongly pro-German, declared Spaak had back-tracked on the king's statement the nation should refrain from collective security and the army should be reorganized only for protecting Belgium from invaders.

## Would Amend Criminal Code

Montreal Judge Thinks Time Has Come For Reform

Montreal.—The time has come, Judge Amedee Monet believes, for amendments to the Criminal Code. "Very often the law is the judge, and not the judge sitting on the bench in certain cases," he said. The Criminal Code calls for a sentence of not less than three years in penitentiary for a man convicted of stealing 25 cents from a letter, yet provides a sentence of not more than three years for defrauding a widow of her last \$10,000.

## Would Develop Trade

Adelaide.—Hope that trade between Canada and Australia would be developed to the greatest extent possible was voiced by Hon. R. B. Bennett, Canadian Conservative leader. He was speaking in response to a talk at the Commonwealth Club luncheon.

## Would Aid Spanish

British Labor Party Says Help Should Be Given

London.—The Labor party and the trades union council, in joint session, decided aid should be given the Spanish government in the civil war with the Fascist insurgents.

The decision represented a change in the stand of the Labor party, which voted at its annual conference early this month to support the government in its non-intervention stand.

A resolution passed at the joint conference said the right of the constitutionally-elected government of Spain to secure the means necessary to uphold its authority and enforce law and order in Spanish territory must be re-established.

The conference decided to call upon the British government in collaboration with the French government, immediately, to take the initiative in promoting an international agreement completely to restore to Spain full commercial rights, including the purchase of munitions.

## More Money On Prairies

Survey Shows Purchases Were Higher During Last Year

Ottawa.—People on the prairies had more money to spend last year than in either of the two previous years, according to a survey by the Dominion bureau of statistics which shows retail sales in the three prairie provinces amounted to almost \$385,000,000 in 1935. This was six per cent. higher than in 1934 and 16 per cent. above 1933.

Percentage increase was about the same for all. Here is how the three provinces came out with 1934 figures in brackets: Manitoba \$137,533,000 (\$129,847,000); Saskatchewan \$119,137,000 (\$111,637,000); Alberta \$128,202,000 (\$120,413,000).

## MADRID BEGINS THE RATIONING OF FOOD SUPPLIES

Madrid.—Besieged and swarming with ragged, hopeless refugees, Madrid began rigorous rationing of food to feed 1,500,000 mouths.

The civil governor announced an emergency provisioning committee, working day and night, was prepared to dole out sustenance to the populace. Thousands of homeless wanderers, stranded by the civil war, roamed Madrid adding to confusion of the capital as the government openly admitted its desperate plight.

The cabinet, in emergency session to solidify defence operations, ordered compulsory billeting for war refugees who, they feared, were a menace to order.

With the city's normal population of more than 1,000,000 greatly swollen the government was alarmed looking and food riots might add to the tremendous task it faces in conserving and mobilizing its resources.

A war ministry bulletin admitted government reverses on all the fronts surrounding Madrid except at Talavera where, it said, Madrid war planes bombed the insurgent airport.

It was said the capital had sufficient food supplies to resist an absolute siege for at least two months.

A despatch reaching Paris from the Spanish battlefield said that Fascist war plane pilots, after observation of all fronts, reported the Socialist government had withdrawn its main forces to the suburbs of the capital itself.

At Navalcarnero the insurgent command drew up plans for a drive into Madrid.

With their outposts 10 miles from the capital—almost within range of their heaviest artillery—the Fascist leaders laid out a careful strategy. They relied principally on a fleet of 200 swift, tiny tanks and armored cars to charge into Madrid's streets ahead of infantry, if necessary, to follow up their projected bombardment of the capital with big guns.

At El Escorial, 4,000 untrained Madrid militiamen fought valiantly but hopelessly to repulse the Fascist's steady advance. The Fascists outmanoeuvred the government troops at every turn. By dawn they had virtually captured the village of Peguerinos, on the front west of Madrid, almost without exposing a man.

At Instanbul Maritime Records disclosed the Soviet ships Blagoff, Kurak, Skirzoff and Sifanoff, loaded with foodstuffs, planes and war material, had passed through the Bosphorus, their destination Spain.

At Lisbon the Portuguese government officially denied reports that it planned to recognize the Spanish insurgent provisional government.

## TO INVESTIGATE CAUSE OF UNREST IN HOLY LAND

London.—Twenty-eight British soldiers and police were among the 300 persons slain during Palestine's many months of disorders, which came to an end two weeks ago, Colonial Secretary William Ormsby-Gore informed the House of Commons.

Persons wounded in the disorders numbered 1,152, he said. Now that comparative calm has been restored, the royal commission of inquiry will proceed to the Holy Land to investigate the source of Arab-Jewish unrest and British garrisons in the country will be reduced, he said.

R. A. Butler, under-secretary for India, said in reply to a question that 60 persons were killed and 500 wounded in the recent Bombay Moslem-Hindu riots, which he described as "essentially communal" in character.

Asked whether tear gas was used to quell the trouble, Butler replied: "Certain experiments have been made."

Miss Ellen Wilkinson, Labor, then asked whether "certain experiments" also had been made with whips. Butler answered some persons had been flogged, but this penalty was within powers conferred on Bombay magistrates under a law passed last year.

Ormsby-Gore, discussing the Palestine situation, said the mandated territory now had a total population of 1,325,000, including 848,000 Moslems, 270,000 Jews, 106,000 Christians and 11,000 of other creeds and races.

Foreign Secretary Eden briefly touched on the Ethiopian situation in reply to a question put by Wilfred Paling of the Labor opposition.

"During the rainy season in Abyssinia," Eden said, "there was no appreciable extension of the area occupied by the Italian forces. According to reports in areas thus far not occupied by the Italian forces, there was much tribal unrest."

## National Defence

Reorganization Of Militia To Be Completed Soon

Ottawa.—Reorganization of the non-permanent active militia is expected to be completed about the beginning of December; and from the first of that month all units in the 11 military districts will be on the new basis. This was learned at defence headquarters.

On the broader aspects of national defence, the much discussed proposals for an increased navy and substantial enlargement of the Royal Canadian Air Force, officials are reticent. Despatches from abroad representing Prime Minister Mackenzie King as returning to Canada with details of a new defence scheme based on a co-ordinated empire policy drew from them no comment.

Militia reorganization, however, was within the authority of those directing the task and, it was said, having regard to the new technique of war, was long overdue.

Following the war the composition of the Canadian militia was studied and some recommendations made; but for the most part these remained only on paper.

## Russians Sent To Jail

Film Trust Executives Convicted Of Wasting State Money

Moscow.—Three executives who "went Hollywood" in Russia were sentenced to labor camps.

The men, former executives of the Eastern Film Trust, were convicted of frittering away state money for the production of movies.

The manager was sentenced to serve four years, the director to two years and a bookkeeper to one.

The accused men were charged with purchasing a bad scenario, commencing excessive production expense, and with wasting money searching for talent.

## New Leader

Saskatchewan Conservatives Select J. G. Diefenbaker At Regina Meeting

Regina.—Saskatchewan Conservatives named J. G. Diefenbaker, K.C., 40-year-old Prince Albert barrister, their provincial party leader.

One of the youngest to be named leader to the Conservative party in Saskatchewan, Mr. Diefenbaker replaced J. T. M. Anderson, Saskatoon, former premier whose resignation was received by the convention in Regina city hall.

## TODAY'S THOUGHT

*GREATER LOVE hath no man than this,  
that a man lay down his life  
for his friends.*

—St. John 15: 13

## REMEMBRANCE DAY

"What did we hope for him we loved?  
Life full and fair, success renown?

Nay, greater fame can no man win

Than a life laid nobly down

For Britain's needs—a soldier's death

God giveth him—the Victor's Wreath!"

**E**IGHTEEN years ago, on November 11th, the Great War terminated. On that day the bugles sang truce, the guns became silent, and the largest conflict in the history of the world was over. Over 560,000 men and women of the British Empire, including 60,000 Canadians, laid down their lives for honour, justice and freedom, principles for which we too should be "Ever Ready to Live or Die Valiantly."

"Remembrance Day" is not a holiday; it's a Holy Day, sacred to the memory of our heroic dead, constantly reminding us how Canada stood side by side with the Motherland in the hour of need. Not only do many Canadian Sons lie sleeping in the "Garden of the Dead" in Flanders Fields and other scenes of battle, but also many, many thousands of broken hearts and bodies and blighted lives resulted.

How do you and I, within ourselves, react and feel towards the sacrifice made on our behalf? Was it worthwhile? Are we truly thankful, or merely indifferent? Do we recall with earnestness and sincerity what the War really meant, or have we shelved it and placed it in the dim recesses of our memory.

"Right-thinking Nations are talking and saying, 'We don't like War. We hate War.' But what are they actually doing to carry out these statements. How can a nation, any nation, expect to keep peace with its neighbours, if it cannot keep peace within its own boundaries. How can a community expect to lead if its inhabitants do not bear that 'Brotherhood' spirit towards one another. And so it is today, as we look over the map of the world, Civil Wars here, Petty Wars there, Communities wrangling and fighting, friends of yesterday passing silently by, no cheery greeting, no friendly smile, because that hateful thing 'Intolerance' has come to live with us; We might as well face the fact, its there, and until such time as we eradicate it from our midst, how can we then help the rest of the World to see that quarrelling and fighting is needless. Prime Minister Baldwin of Great Britain said, in his speech to the Vimy Pilgrims at Westminster Hall, 'That if international differences in this Year of Grace could only be settled by armed force, then it was time that the world, and civilization with it, perished.'

"What is this foe with whom we keep the quarrel?"

What is this conflict that we must suppress?

What about an idol in the market-place—

The symbol of a nation's selfishness!"

Yet today in Flanders Fields the Poppies blow, but voices are crying to us out of the mist, "We sleep not, Comrades, do ye keep the faith?" Lets start today to make that advance that will heal some wound we made, help someone back to the way of faith in humanity, help the fallen by the wayside; or will we be as the High Priest of old, pass by on the other side.

Communities must set the example first, but, before doing so, the people in it must commence with themselves, this having been accomplished, it will spread Province and Dominion wide, and like the snowball, once it starts to roll it will grow bigger and bigger, and bring about that state of affairs that the Greatest Soldier of All died for on Calvary's Cross.

But it's coming yet for a' that,

That man to man the world 'er

Will brithers be for a' that

So on Wednesday, November 11th, when we honour the bravery of our soldiers and the sacrifice of our loved ones, and when we recall the sorrows of parents and of children the world over, we should dedicate ourselves firmly and finally to the cause of peace, in order that brethren throughout the world may dwell together in unity. To bring this about, we must first have peace within ourselves; secondly, peace with our immediate neighbors, the stretching-out of the hand of friendship to all mankind, never mind his creed, his beliefs, his politics; mind only this one fact, "He is human, even as you or I," and in helping him we help ourselves. All that we send out into the world is all that we will get back. Start now and do your bit, remembering what those who sacrificed their lives for you and for me had in their thoughts, "If I should die, think this only of me; That there's some corner of a foreign field that is forever England (yours)."

Be present at the ceremony at the Church, and in the "Two Minutes Silence" listen to the spirit voices say:

Mother, with unbowed head, Hear thou across the sea

The farewell of the dead, The dead who died for thee.

Greet them again with tender words and grave

For, saving thee, themselves they could not save.

Far off they served, but now their deed is done,

For evermore their life and thine are one.

**P.D.**

SEZ—It's a long way to TIPPERARY,  
but who cares, as long as we can get to  
the ARMISTICE DANCE.

One by one fresh berries and fruits are disappearing from the market. The days and nights are getting colder. Appetites are getting keener. More social gatherings are in evidence. The cold weather guest season is with us. Our bodies demand more food than during the heat of summer, but heavy foods must be balanced and those fruits and vegetables that still remain must be called upon more frequently.

The canned fruit juices are a "natural" for this season of the year and among these pineapple juice lends itself exceptionally well to a wide variety of uses. Then this year we also have those attractive spear-like slices of canned pineapple which encourage the preparation of all sorts of unusual and delicious dishes.

The following recipes are offered for your consideration this fall. You will find them delicious and healthful.

- Hawaiian Cream**
  - 2 tablespoons quick-cooking tapioca
  - 1/2 teaspoon salt
  - 3 tablespoons sugar
  - 1 egg yolk, slightly beaten
  - 1/2 cup milk
  - 1 1/2 cups canned Hawaiian pineapple juice
  - 1/4 cup shredded coconut
  - 1 egg white, stiffly beaten
  - 1/2 teaspoon vanilla
- Combine tapioca, salt, sugar, egg yolk, milk and pineapple juice in top of double boiler and stir enough to break egg yolk. Place over rapidly boiling water, bring to scalding point (5 to 7 minutes), cook 5 minutes, stirring frequently. Add coconut. Remove from over boiling water. Fold in egg white and hot mixture into egg white. Add this to the remaining tapioca mixture and blend. When cool, add vanilla. Chill and serve in sherbet glasses. 4 to 5 servings.
- Pineapple Fruit Cocktail**
  - 1/4 cup canned Hawaiian pineapple juice
  - 1/4 cup grapefruit juice
  - Sweeten to taste
  - 1 cup canned cherries
  - 1 cup canned pears
  - 1/2 tablespoon crystallized ginger
- Mix the pineapple juice and grapefruit juice, sweeten to taste and chill. Remove pits from cherries (either white or red), cut pears into cubes, alternate layer of fruit in cocktail glasses, pour over fruit juices and sprinkle each service with some chopped ginger. Serve ice cold. 4 servings.
- Meat Loaf Honolulu**
  - 1 1/2 lbs. ground beef
  - 2 medium sized onions, chopped
  - 4 soda crackers, rolled
  - 1 cup seedless raisins
  - 2 teaspoons salt
  - 1 teaspoon pepper
  - 3 eggs beaten slightly
  - 1/4 cup grated cheese
  - 6 half slices of bacon
  - 1/2 of a No. 2 can Hawaiian pineapple slices
- Combine all ingredients except cheese, bacon and pineapple. Grind a deep pan (6" or 6" x 10"), place 6 of the spear-like pineapple slices and press one half of meat mixture into pan. Sprinkle with cheese and press in remainder of mixture. Bake in a moderate oven (about 375° F.) for at least one hour. When half done arrange bacon slices across loaf. When ready to serve, turn meat loaf on a platter, pineapple slice up. Garnish with parsley. Serve with hot tomato sauce or catsup. 6 servings.

## SCHOOL LESSON

By L. W. Brockington, K.C.

Wednesday, November 11th, is a holiday throughout Canada. The holiday is known as "Remembrance Day" and is intended to celebrate for all time the ending of the Great War and the signing of what is called "The Armistice." On November 11th, 1918, when all the nations of the world engaged in that War decided "on that day to cease fighting and to prepare for the signing of a peace. The word 'holiday' means a 'holy day' and most of our great holidays celebrate a joyous event in the history of christian people, such as Christmas Day, or some sad event such as Good Friday. Wednesday is a Holy Day, on which we shall celebrate both happiness and sorrow. At eleven o'clock Wednesday every man, woman and child throughout Canada is expected to cease from work and from play, to keep silent for two minutes, and during that time of silence to let their hearts and minds dwell upon the memory of all the hundreds of thousands of young men who were killed, many of them in foreign fields, fighting for a cause which they believed to be right and just. In other words, while we shall all celebrate joyfully this great national Holy Day, we shall also recall, throughout the day, and particularly during the 'Two Minute Silence', the sacrifice of so many young and beautiful lives. The word 'sacrifice' also means, to make Holy or Sacred, and when we talk of the Sacrifice of Lives, we mean that men who gave their lives for us and for their country, by so doing, have done something Holy and Sacred.

If you had been alive in 1914, and for months afterwards, you would have seen some wonderful sights. From all over Canada, when the Great War broke out, men flocked to the recruiting offices to join the Canadian Army. They came by steam, ship, by train, by canoe, by dog team, and some walked many miles to defend Canada and her sister nations of the British Commonwealth in the hour of their need. You will read, and perhaps may have ready many statements of the causes of the War, and the reasons why the various nations engaged therein, joined in the great struggle. Perhaps all the reasons and all the causes will never be known, but peace-loving men decided to leave their homes and to play their part in the terrible struggle, because they believed that the cause for which they were fighting was just. From Canada alone nearly six hundred thousand (600,000) men joined the Canadian Army. Four hundred and twenty-five thousand (425,000) served in France or in Flanders, or outside Canada. Nearly thirty thousand (30,000) were killed or died from disease. From all the nations of the British Commonwealth the British Isles, Australia, Canada, South Africa, New Zealand, India, The British West Indies, and all the other far flung places, which show loyalty to the same King, nearly eight million (8,000,000) men enlisted in the Army and over a million (1,000,000) men were killed. For four years the War continued. During that time the fathers, brothers, the uncles and perhaps the grandfathers of many of you were exposed to bloodshed and horror. Millions of mothers Wednesday, will recall the memory of their dead sons, millions of widows will recall the memory of their dead husbands, and millions of children will recall the memory of their fathers. These sad memories will become very real not only in the British nations, but in France, in Italy, in the United States of America, in Germany, in Australia, and in fact all the countries which took part in the Great War. The men whose death will be remembered whether they be Canadian or German, were mostly simple men, kindly men who loved their families, their homes, flowers, country-side and all the little things of life, which add so much to our happiness and joy. The mothers, children and wives of Germany have exactly the same feelings as the mothers, children and widows of England and Canada. We, in Canada, celebrate victory, but a victory that was paid for most dearly with the lives of Young Canadians in a terrible war, which is responsible, to a great degree, for the misery and distress from which the whole world suffers today. In Germany and Austria while they will be celebrating our victory they also will be mourning their loved ones, and sharing with us the same heart-felt sorrow. To the soldiers who have returned and above all to the soldiers who never came back, we all of us, men, women and children of Canada, owe a debt. It is a debt that can never be repaid by the receipt of things that have been lost, because nothing can ever restore to the men who survive the four years of peace in which they might have better fitted themselves for life, and its problems, and nothing can ever restore to parents who lost their loved ones who made the great sacrifice. But while the debt can never be repaid, each one of us can honour the memory of the fallen and the service memory of the living by promising and by carrying out the promise to do everything in our power to work for peace, good will and understanding amongst the nations of the earth, to do everything we can to prevent war, to pay honour to the returned soldiers who dwell in our midst and to keep a place in our hearts always for the memory of those sons of Canada who gladly paid the price and left the reckoning to God. Many of our Canadian soldiers are buried in France, and every Canadian mother, whose son is there buried, has been allowed to suggest an inscription to be placed on his tombstone. Rt. Honourable R. B. Bennett tells a true story of an Edmonton mother. She was awarded, in the name of her son, the Victoria Cross, after his death, for the very gallant deed in the performance of which he was killed. The inscription that she suggested, and which has been placed upon his tombstone in France is, "How blessed it is for brethren to dwell together in Unity."

Wednesday, when we honour the bravery of our soldiers and the sacrifice of our loved ones, and when we recall the sorrows of parents and of children the world over, we should dedicate ourselves firmly and finally to the cause of peace, in order that brethren throughout the world may dwell together in unity.

# YOU Share In Canada's Greatest Co-Operative Business

**L**IFE INSURANCE is the greatest co-operative business in Canada. As a policyholder, YOU are associated with more than 3,500,000 other Canadians in this great enterprise.

Every business day last Year Life Insurance Companies in Canada distributed, to Canadian policyholders and beneficiaries, over Half a Million Dollars.

Life Insurance enables YOU to provide financial security for yourself and family. It also benefits the country as a whole through the investment of Life Insurance funds in important public enterprises.

Life Insurance dollars give employment to workers throughout the Dominion. Transportation facilities are extended, highways built, streets paved, schools erected, water, sewage and other necessary works constructed. Life Insurance dollars help to finance the farmer, and bring business to the general store and country merchant.

In the past five years of business depression, Canadian policyholders and beneficiaries received over Eight Hundred Million Dollars in payments from their Life Insurance funds. Life Insurance Companies have fulfilled every obligation one hundred cents on the dollar.

As a policyholder, YOU can take justifiable pride in sharing in this, the greatest co-operative business in Canada.

## Tourist Traffic Shows Advance In Mountain Parks Of British Columbia

Motor tourist traffic to the National Parks of Canada for the six-month period ended September 30, 1936, showed an increase of 14 per cent. over figures for the corresponding period in 1935, according to a statement issued by the Hon. T. A. Crerar, Minister of the Interior. With one exception, individual park units, where a record of motor travel is maintained, disclosed gratifying gains over last season.

A remarkable advance was registered in the mountain parks of British Columbia, where Kootenay's total of 44,656 visiting motorists represented a gain of 29 per cent. over 1935. Registrations in Yoho Park which totalled 17,474 persons reflected an increase of 20 per cent. over the previous season.

Of Alberta's National Parks, Banff and Waterton Lakes showed the greatest gains. Motor registrations at the eastern gateway to Banff Park totalled 118,247 against 91,502 for 1935, a gain of 29 per cent, and traffic to Waterton Lakes Park advanced from 47,777 to 58,546, an increase of 22 per cent. Motor traffic to Jasper Park increased 55 per cent. to 3,391 and a slight gain was recorded at Elk Island Park where 42,832 persons were counted. Attendance at Buffalo Park declined slightly from last season, the figure for the six-month period totalling 8,440.

Saskatchewan's national playground, Prince Albert Park, experienced an increased flow of tourist traffic, with the total of 24,771 visitors representing a net gain of 30 per cent. Riding Mountain National Park in Manitoba with 94,827 visitors to September 30, is well ahead of the total for the same period in 1935 and promises to exceed the record of 100,035 established for the whole season of 1934.

### Electric Plough Used In England

Used On Farm In England For The First Time

Electric ploughing was one of the subjects dealt with at the recent World Power Conference held at Washington, U.S.A., and mention was made of the only electric plough in England which has been in use for the past 12 years on a farm in East Grinstead. The equipment consists of a two-wheeled carriage, upon which is mounted a 12 h.p. motor, complete with starting switch and speed reduction gear, as well as two cable drums, either of which can be driven at will by means of the motor. The equipment is anchored in a convenient position in the field and adjacent to the overhead lines which supply the power. The set operates on the roundabout haulage system. A double-furrow anti-balance plough is used, being drawn to and from across the field by a steel rope attached to the drums on the carriage. The speed of ploughing is from one-third to one acre per hour, varying with the nature of the soil and depth of furrow ploughed. Five acres a day is the average with such a small set.

### Coronation Colors

Red And Blue Are Given Royal Approval

Red and blue have been chosen for popular dress at the coronation of King Edward VIII. next year. Royal approval has been given to two particular shades of each of the colors chosen from thirty hues of each. The selected shades will be called "coronation red" and "coronation blue."

The red is between magenta and scarlet and the blue between royal blue and lido.

London ladies are flocking already to shops to buy the proper shade.

### Useful Information

Mrs. Waite called unexpectedly at her husband's office and found that he had gone out for the day. "You say Mr. Waite is out," she said to the new office boy. "Do you know where he has gone?" "I don't know, ma'am," replied the youth. "How tiresome," she went on. "Perhaps his secretary could tell me." "She certainly could," said the office boy. "She's gone with him."

American people pay more in federal, state, and local taxes than they do for food, rent, clothing, and other living expenses.

### Modern Pied Pipers

Scientists Faced With Necessity Of Exterminating Rodents

Modern Pied Pipers are two scientists who left Honolulu recently to fly 2,500 miles across the Pacific to Wake Island to kill rats.

Faced with the necessity of exterminating rodents on Wake before inaugurating passenger service to the Orient, Pan American Airways secured the federal government's cooperation in sending scientists to supervise the job.

Armed with traps, guns and poisons instead of a flute, Henry K. Spencer, biologist with the U.S. experiment station in Honolulu and H. G. Hansen, member of the U.S. biological survey in Hawaii, drew the assignment.

Wake actually is comprised of three tiny islands—Wake, Peale and Wilkes—enclosed by a coral lagoon, 2,500 miles due west of Honolulu. On Peale, Pan American has built its air base, third stepping stone on the route to Manila, and here the rats cavort. They eat everything available, even gnawing through heavy canvas, boxes and crates to filthy food supplies.

Thousands of them, descendants of rats who "hitch hiked" to Wake during ancient Polynesian migrations, overrun the three islands. They reproduce faster than men can shoot them; they are smart enough to dodge ordinary traps after the first hundred have been caught.

### Soil Is Wearing Out

Conservation Is Necessary In Canada To Ensure Good Crop

In parts of Europe where soils have been tilled for a thousand years or more yields are increasing while here in Canada, on what is almost virgin soil, comparatively speaking, our yields are quite unsatisfactory.

Most of our soils have been cultivated for many years, and unsatisfactory crops are blamed on the weather, on the seed used, on late or early seeding as the case may be, and we quite overlook the fact that, probably the real cause is soil exhaustion. Our soils are wearing out.

Moreover, soil deficiency may manifest itself in live stock through lack of thirst, lack of resistance to disease, depraved appetite and in other forms which we sometimes attribute to just plain carelessness.

We might as well admit that plant food in the soil is not inexhaustible. It is the waste product of the potash, phosphate, nitrogen and lime that we add to our land without putting any back and expect to go on growing good crops indefinitely and keeping our live stock healthy and vigorous.

Soils require intelligent treatment, and now that science has come to our aid with quick practical soil tests there is no reason why we should longer continue to ignore the subject of soil conservation which is so fundamental to successful agriculture.—Farmer's Advocate.

### Must Be Given Chance

Advertising Only Once Is Poor Way To Get Results

Suppose you threw a stone at a mark and missed it; what would you say? Would you say that there was no mark to hit, or that it couldn't be hit, or that the stone was so mishapen that it would not carry true to aim? Or would you be candid and say that the failure was due to your own lack of skill? And if you really wanted to hit the mark, would you make but a single throw? Would you not keep on trying until you hit the mark—probably as a consequence of improved skill in throwing stones?

Yet there are men who use advertising but once, and who, when the hoped-for results are not instantly obtained, declare that advertising is no good, or that the medium is no good.—J. C. Kirkwood, in Marketing.

### Advances In Education

Great advances had been made in the school system but there had been great losses too because the personality of the teacher had been rated of secondary importance. In Great Britain, it was different. There was a lack of regimentation there and little importance was placed on grades and credits of students.—Sydney Smith, president of Manitoba University, speaking at the Canadian Educational Association in Regina.

Magistrates in Shanghai Province, China, will in future get a salary of \$6.75 a month. 2175

### GUIDE DOGS FOR BLIND

The object of the Guide Dogs for the Blind Association is to provide trained dogs to enable blind persons to travel with ease and confidence. Our picture shows two dogs leading their blind mistresses along an English country road. The dogs are trained to heed traffic signals and usually take about three months to train.

### Has A Unique Display

Provincial Public School Exhibition Attracts Large Crowds

A unique display, "The Evolution of Making a Bed," entered at Nova Scotia provincial exhibition by children of the Dartmouth school novalia, attracted considerable attention from patrons of the show at Halifax.

The display consists of a number of drawings contributed by children from grades one to eight. "The idea," Supervisor of Dartmouth Schools G. C. Beasley explained, "is not to judge the display by the individual drawings but by the development by grades."

"The work of the first grade pupil is sometimes mere lines to indicate the bed. One can almost see the mind of the pupil developing with the drawings as the work of the succeeding classes reveals their ability to illustrate the desired idea. In the final stage the work is of high character."

Mr. Beasley got the idea for the display while visiting Scotland last year.

### Livestock On Prairies

Census Shows Fewer Horses And Hogs But More Cattle

Small reductions were reported in the number of horses, cattle and sheep on Canadian farms, by the Dominion Bureau of Statistics as of June 1 last compared with the same date a year ago. The number of hogs, however, increased by 23 per cent.

The census return for the three prairie provinces showed a comparison with the last census five years ago. In all three provinces the number of cattle increased in the five years while the number of horses, hogs and poultry decreased. The number of sheep increased in Saskatchewan but decreased in Manitoba and Alberta.

Confucius is not a Chinese name. It is the westernized, or Latinized version of "K'ung Fu-tze," a Chinese phrase meaning "The philosopher, or master, K'ung." K'ung was his clan, or family name.

Bolivia ranks second in world production of tin, producing about one-fifth of the total supply.

### Toys For Tots Are Fun To Make

PATTERN 5723

Establish your reputation with these simple toys. Donate them to the Fair—they'll sell like hot cakes! Give them to some tot for Xmas—they'll meet with instant popularity! You'll enjoy making them, too, for they're but two pieces joined. You can make them inexpensively, of bits of leftover material, they need so little! In pattern 5723 you will find patterns for the animals shown; directions for making them and material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept. Winnipeg Newspaper Union, 176 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## Woman From Scotland The Unsung Heroine of a Most Amazing Household

### Displacing The Busy Bee

Man Attempting To Take Over Job Of Pollination

Middlemost man is constantly trying something to throw the old order out of kilter. We have always liked that simile "busy as a bee," but the time may come when it will have to be relegated to the limbo of forgotten things simply because it has become obsolete.

Bees, as every schoolboy knows, perform a two-fold service in the natural scheme of things. The little insects carry on pollination as they go from blossom to blossom in quest of nectar. Of course, the wind carries pollen, too, but the bees seem to make a better job of it.

Now man is making a brazen attempt to make the bees feel that they are no longer needed to assist in pollination. According to the New York Sun, archaists in Waukegan, Washington, this spring, under the supervision of the Washington State College extension service, pollinated apple trees by hand; in nearly every instance the apple set was almost doubled. Those from pollinating varieties of trees were rubbed on screens, causing the pollen to drop through upon a piece of paper. After being allowed to dry for 48 hours the accumulated pollen was placed in a bottle. Then the workers, equipped with small brushes, touched one blossom in every second, third or fourth cluster with a tiny particle of pollen.

One limb dependent on bee pollination was used as a check. It contained 137 bloom clusters; of these only seven blossoms set, producing seven apples. Another nearby limb had 93 clusters; one bloom in each cluster was pollinated by hand and 87 apples were produced, weighing the limb to the ground. Hand pollination pays where trees are healthy and crops light, provided that the task is well performed. They believe the process would cost less to be cheaper than the annual shipment of millions of bees into the district.

### Reward Would Be Proper

For Canadian Farmers Who Constantly Produce Good Bacon

Quality is essential, but of equal importance is the production of goods in Britain is dependability and continuity of supply. The grower who constantly maintains one sow or two, striving always to improve the quality, is making a far greater contribution than the in-and-outer who one year takes out ten litters of pigs and the next year none at all. It would be quite proper if some system of reward or compensation could be instituted for those who carry on with steadiness of purpose and with continuity of production.

Canadian farmers have been obliged in the past to think very little about marketing, and were thus free to concentrate largely on production. Now since the nations have all become jittery and have adopted the policy of self-sufficiency, marketing is a real problem for the governments and for the farmers themselves. We must of necessity become market conscious and plan our operations with markets in mind as well as yields.

Latterly hogs have been the best paying live stock on the farm, and there has been what amounts to an unlimited market for the product. In spite of that our swine production record during the past five years has been nothing to boast about. A great opportunity has been lost!

### Figured In History

King James III. Contracted Measles At Bad Time

Though gout could always be counted on to play a part in history by laying aside statesmen at vital moments, I can think of few who have suffered from mumps, whooping-cough or kindred infantile diseases when in office.

A case where measles may have changed the course of history occurred in 1708, when James III., the Old Pretender, had made preparations to head a Jacobite rising. The circumstances were peculiarly propitious. Scotland, irrespective of party, was seething with discontent over the Act of Union; he had a French fleet, and possessed plenty of arms and money.

Then he caught measles. When he finally arrived in the Fifth of Forth he was a few days too late—this disease had made him miss the psychological moment for landing.—London Daily Telegraph.

The eyes through which Helen Keller, the famous blind woman, sees the world, are now revealed.

The story is that of a Scottish woman who for 14 years had to see everything she looked at in three different ways. Now that woman—Miss Polly Thompson, Miss Keller's secretary—need see only twice, for Mrs. Anne Sullivan Macy, Miss Keller's teacher, read recently.

Until Mrs. Macy's death, the woman from the Scottish highlands was an unsung heroine of one of history's most amazing households. For a decade and a half she buried her identity in the task of serving as eyes for the blind and deaf Miss Keller, and for the virtually blind teacher who led Miss Keller to international fame.

While she lived, the teacher held the spotlight for her accomplishment in teaching Miss Keller to speak, and to "hear" through her hands.

However, it was not Mrs. Macy, great though her contribution was, but Miss Thompson, through whom Miss Keller saw life almost as clearly as though the eyes were her own.

To keep her employer abreast of current events, Miss Thompson maintained a household on lines astounding only to the normal.

The mere fact her two companions could not see did not prevent their reading their favorite newspaper at breakfast every morning. Propping it up, the secretary would read as she served the meal. Mrs. Macy, who could hear, would hold Miss Keller's hand and relay the news to her in finger tip "writing." Miss Keller would comment in her monotone voice, and discussion would pass from hand to hand.

If the news were particularly interesting, the three would retire to the living-room and talk it over in detail.

After that, on an average day, would come the sorting of the mail. More often than not, Miss Keller would have a speech or plea of some sort to write for aid to the blind. While she went to the third floor to write it, finding her own way to her study, Miss Thompson would go through the incoming envelopes.

If there was an urgent letter, the secretary would stamp her foot on the floor. Miss Keller would feel the vibration upstairs, and hurry down to compose an answer.

When evening came, there was entertainment to think of. They might stay home and listen to the radio, with Miss Thompson "writing" the broadcast in Miss Keller's palm. If there was music, Miss Keller's fingers would rest on the loudspeaker to pick up vibration.

They went to movies, too, and plays. Miss Keller saw the scenes as they flickered on and off the screen, thanks again to her secretary's sensitive fingers. If Mrs. Macy went along, the relay worked again.

It was because of Mrs. Macy's falling eyesight that the 29-year-old woman from Glasgow became Miss Keller's secretary.

### Patriotic Corn Developed

Ears Had Stripes Of Red, White And Blue Kernels

Patriotic corn — red, white and blue—was harvested this fall at the Connecticut Agricultural Experiment Station in New Haven, Conn.

Repeating how it was developed, Dr. W. R. Singleton said it might be described as "a piece of scientific nonsense."

Dr. Singleton said he divided the silks on a white stock into three parts. He powdered one part with pollen from a red-kernelled plant, pollinated the second with blue and the third with white. Then he covered the silks carefully to prevent contamination by other pollen.

The result at harvest: Ears with stripes of red, white and blue kernels.

### The Philosophy Of Unity

Canada's Minister Of Finance Has The Right Idea

Hon. Charles Dunning has put the case for Canada and Canadian unity just about as succinctly as it is possible could be stated. Speaking a short time ago to the Maritime Board of Trade at Charlottetown, the Minister of Finance said:

"The things which unite us are infinitely more precious and valuable to us than the things which divide us."

That sentence deserves a place as a motto on the walls of every home in this country.—Halifax Herald.

## Keeps each ROYAL YEAST CAKE FULL STRENGTH

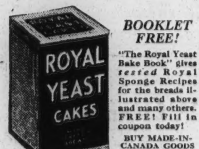

## GRAHAM BREAD

## Use Royal Yeast Cakes and Royal Sponge Recipes for these tempting breads...

Each Cake of Royal Yeast will retain its absolute freshness for days—weeks! A special air-tight wrapping assures full leavening power and uniform results every time. No other dry yeast has such protection. That's why 7 out of 8 Canadian housewives who use dry yeast insist on Royal Order Royal Yeast Cakes today.

Interfering With Shipments

## Spanish War Means Shortage Of Raisins From Valencia

The civil war in Spain is likely to have a disastrous effect on our Christmas puddings. Usually in September the first shipments of raisins are sent from Valencia, but this year most of the crops have been destroyed by the marching armies and only very small supplies of the fruit will be available. It was reported that a small shipment had left Spain, but London importers had no information about it. Even if the fruit is there it will be difficult, for shipping companies will not allow their vessels to enter Spanish ports.—Manchester Guardian.

Susan R. Anthony, suffrage pioneer whose likeness is to appear on a new U.S. postage stamp, is the second woman so honored. The first was Martha Washington, wife of the first president.

## Thou Shalt Not Love

— A NOVEL BY —  
GEORGIA GRAGG

CHAPTER VIII.—Continued

That was Starr Ellison's deadly fascination—the thousand and one contradictions in her volatile personality that made Michael Fairbourne certain that it had been nothing less than inspiration which had led him to concoct that story about her having Egyptian princess ancestry. He was probably right, without having known it, except by inspiration. If truth were told, she probably had come straight down in a direct line from the sirenet of all sirens. It would not have been hard to persuade Michael that Cleopatra herself had sent along her blood—and her allure—through the centuries to the girl-woman who called herself Starr Ellison.

Michael stared down the long room at Lance Marlowe's guests. In the group clustered near the flickering fire on the hearth Starr was almost hidden by the men who surrounded her. Moths, Stephanie called them. And Michael Fairbourne realized suddenly, with an attempt at mental castigation, that he was no better than the rest. He felt an uncontrollable impulse to follow wherever she went. But he had no intention of joining that crowd. He would not. At least he could keep his self-respect to that extent. So he remained on the fringe, a dark and angry moth, watching.

The group parted when someone called for fresh cocktails, and Michael saw Starr. Her exotic beauty was like a flame. She was wearing a startling costume this day—which was Russian in effect. It was all black and scarlet with little bands of fur around the throat. She carried a ridiculous little black muff of the same satrac that appeared to serve her for gesturing purposes as well as the fan for a Spanish woman, or any of the well known props. Her dusky cloud of hair, beneath a tiny scarlet hat, fell almost to her shoulders.

No one but Starr Ellison would have dared wear an outfit like that, and she knew it. Her clothes were as breath-taking as her conduct. She long since had got out of hand with Michael who at first had considered it his duty to take her shopping. Starr had ideas of her own, and he had not hesitated to let him know it. He could pay the bill—and did—but here was the selection.

Her eyes met Michael's, and they held his duty to take her shopping. Starr had ideas of her own, and he had not hesitated to let him know it. He could pay the bill—and did—but here was the selection. Her eyes met Michael's, and they held his duty to take her shopping. Starr had ideas of her own, and he had not hesitated to let him know it. He could pay the bill—and did—but here was the selection.

That one long look from gray eyes to black... Suddenly Starr left her little group of satellites. A freakish impulse led her to Michael. A provocative slant of those deep-lidded eyes swept the tall, stern-faced man. She stood in front of him, her black eyes lifted to his face. She said suddenly:

"You're elected to take me home, Michael!"

A stiffness crept over his big frame. "May I ask why?" he said, his tone itself challenging.

Starr said innocently: "Because you're the most miserable-looking man present, and you need thawing out." She spread her hands and laughed. "Besides, everybody else is tight, and some of them might have the idea they could drive."

When he did not reply directly, the imperious "Play-Girl" commanded: "Hurry! I've barely enough time to get home and slip into a bath and some sort of a dressing. Tell the chauffeur to take me to the Mayfair Hotel."

Neither of them had noticed Lance Marlowe saunter up, but the ever-present Lance suggested in his smooth voice:

"Why so home? You can dress here, Starr."

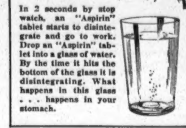

A ripple of amusement greeted his words. Starr did not seem to mind the amusement. She favored Lance with one of her mysterious smiles.

## DO THIS when you wake up with a Headache

ENJOY RELIEF BEFORE YOU'VE FINISHED DRESSING

"Aspirin" Tablets Dissolve Almost Instantly

When you wake up with a headache, do this: Take two quick-dissolving "ASPIRIN" tablets with a little water. By the time you've finished dressing, nine chances in ten, you'll feel relief coming.

"Aspirin" provides this quick relief because it is rated among the quickest methods for relief science has yet discovered.

"Aspirin" tablets are made in Canada. "Aspirin" is the registered trademark of the Bayer Company, Limited, of Windsor, Ontario. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get **ASPIRIN** LOOK FOR THE BAYER CROSS

It might have meant yes—or no—or perhaps.

Michael quivered suddenly with black rage. He had not missed the obvious. For Starr to change, to dress here, certainly meant there would be here something more for her to dress in than Lance Marlowe's pajamas. Why? Was it true, then, what people were whispering about her? Why should she have a wardrobe, or any part of it, here? How many times had she stayed here with Lance?

He burst out savagely? "You can keep your accommodations, Marlowe. I'll take her home."

Lance's thin eyebrows rose. "All in fun, Mike, old chap—Don't get the wind up."

And immediately Michael Fairbourne was conscious of having made a transcendental ease of himself, by being serious when everybody else in the place was ragging. The ripple of amusement grew to a chorus which dinned in his ears. Michael clenched his fists. Starr was laughing more amusedly than any of them.

Michael was glum and silent as they rode down in the elevator. In silence he helped her into his roadster, got in and jammed down the starter. Starr leaned back against the upholstery and smuggled down comfortably in her seat, but her heart was doing a queer little kind of pounding dance. From the corner of her eyes she glanced toward the clean-cut profile of the man beside her, admiring, in spite of all the will power she could bring to bear on that subject, the cut of his lean, strongly molded, set jaw; his firm, tanned features. Why did he have to be so unreasonably attractive?

"Don't be more of an idiot than you can help," she was telling herself sternly. "This is a business arrangement, and you certainly ought to know it by now."

But even as she watched every play of his features, saw the keenness of his gray eyes as they were set on the traffic, in her heart was one dull thought. If only things could be different!

Just looking at him gripped a pain around her heart that had never been there once in her life before she had met him. He was so alive and carelessly masterful and different. In spite of the way he had acted as far as she was concerned, she could not force it from her mind that he was basically finer, more honorable, than any of the rest of that set he played around with. Certainly he was the only one who, so far, had not allowed the "mysterious" "Play-Girl" to twirl him, around her "little finger" whenever she chose. And that had been her whole intention.

Michael was still silent—furiously so. He cut his way through the

A List of "Wanted Inventions" and Full Information Sent Free On Request. The RAMSAY CO. 127 OTTAWA, ONT.

gathering dusk and the mase of traffic with vicious speed.

For a second Starr closed her eyes. Her delicate cameo profile was so white, except for the too-bright coloring of her defiant young mouth.

"And I am making you very rich, Michael—Hansen?"

That was the first time since the night of the debut party that she had mentioned their bargain.

He said stiffly, without moving his gaze from straight ahead:

"In the last few days the sales of my book have jumped amazingly, thanks to you!"

"Thanks to my complete lack of reliance on the public's liking of my love affairs, you mean!" she corrected him brazenly.

The line of his hard-gripped jaw was white.

"Starr! How can you?"

Her red lips twisted ironically. That certainly was funny, coming from Michael Fairbourne—the man who had been so insistent in saying once: "All I ask is that you keep your name in the headlines—I don't care how."

Well, she had done that for him. The news was becoming as familiar to the reading public as the weather report. In just the short time since she had swept onto the New York horizon like a brilliant meteor, she had blazed her mad, reckless way through highly colored escapades which could not be ignored—were new news. She had accomplished what she had set out to do, too, as far as she herself was concerned. Her metamorphosis was complete. Starr Ellison was lost—she was all "Play-Girl!"

It had not taken long, and now she was pulling the strings. Men were her puppets.

Michael was saying roughly: "That's happened to you, Starr Ellison? You've grown into something shallow, and unreal, like a lot of vivid color painted on glass!"

"Play-Girl" laughed. She echoed: "Vivid color painted on glass! How clever of you, Michael-Hansen. I must remember to tell that to Lance. He'll think it too divine and pass it around as he has passed that 'so brilliant remark of mine about my insatiable appetite for kakehah!"

Suddenly his anger got the better of him. His eyes blazed as his hands tightened on the wheel until the knuckles showed white.

"Lance!" he spat out. "Look here, Starr, I never intended for you to carry out this thing this far. What I may have thought about you at first—well, I've changed my mind."

Do you realize what people are hinting about you?"

And then Starr was angry, too. A deep, bitter anger. The supreme arrogance of the man! She flared:

"What right have you to tell me where I shall start, and where I shall leave off? The only interest you can possibly have is in whether I keep my name before the public or not—that was distinctly your bargain!"

"I'm doing that—pleasely! I'll carry it all as far as I please! It's none of your business! Yes, I know what people are saying—that I am Lance's mistress!"

She turned to meet the full glare of his gray eyes as the speed of the car slackened momentarily. She dropped her head.

"Well, what do you think?"

Michael looked long at the veiled allure of her eyes, at the mocking intimation of her mouth. Then he studied the almost childlike curve of her white throat against the dark fur, and reflected on the everlasting constancy of her as if in very truth she were the alien type of another day which his own press work had made her in the eyes of the public.

He said hoarsely: "I don't know. I don't know what to think about you at all—in any way. I wish to heaven I did!"

All at once a hot flood of words fell on her ears.

"I know one thing about you. You're not the girl I thought you were when I first found you. If I'd had the faintest idea you were not, I'd never have let you in for this thing in a million years. I thought—I thought—well, never mind what you've done, and as if you'd ever loved me, maybe I'd know just why you were playing La Luna. . . . Never mind that, either. What I do mind is now! What's happening to you since you've gone crazy with a little love power?"

Starr gave a thought to her future? Have you considered what will become of you when all this has worn off?"

"I think you warned me once before that 'Play-Girl' would not last forever, and Starr placidly, and her delicate shoulders shrugged. "I'm not worrying."

"You should be! When 'Play-Girl' is finished, where will your fair-weather friends be then—Lance Marlowe and all the rest? You

very actions now may forever ruin your chance for any real future happiness!" (To Be Continued)

## Unprecedented Flying

American Experiments may Lead To Using Super-Transport Planes

A revolutionary change in air transportation with gigantic liners speeding across the United States thousands of feet above the altitudes attained by present commercial planes is presaged by experimental flights at Kansas City, Mo.

The tests are being conducted by Transcontinental and Western Air, Inc. The company is collecting scientific data regarding aeroplane performance, atmospheric conditions and the feasibility of operating schedules at drastically higher altitudes than are now common.

Such knowledge is to be embodied in the construction of a new super-transport plane designed for regular operation on the company's coast-to-coast route.

When completed, such planes are expected to be capable of unprecedented performance at altitudes lofty enough to prevent interference from weather disturbances closer to the earth's surface.

Capt. W. Tomlinson piloted a laboratory plane to an altitude of 30,000 feet in 30 minutes in a recent experimental flight. From a temperature of 110 degrees at the airport, Tomlinson reported a precipitate plunge of the mercury until it touched 18 degrees below zero at the peak of his climb.

Tomlinson hopes to reach 45,000 feet. At that height, greater efficiency in performance will be noticeable and additional data will be obtained, he believes.

New trips into the troposphere and stratosphere are planned. Accompanying Tomlinson on the flight is an engineer, who keeps a record of the apparatus being tested for altitude efficiency. Automatic camera equipment photographs the entire instrument panel, and records on film the readings of all instruments at different altitudes.

The laboratory plane is equipped with heating and oxygen apparatus. Tomlinson wears a wire frame mask through which a small tube feeds him oxygen. A small microphone fastened to the mouthpiece of the mask enables him to report his progress from the plane by radio to a ground crew.

## The Dead Sea

Modern Science Is Taking Out Valuable Chemicals From Its Waters

The Dead Sea, the strangest body of water in the world, is slowly coming to life again.

Lying 1,300 feet below the level of the Mediterranean, receiving an inflow of 6,000,000 tons of water daily from the River Jordan, without an outlet, the sea has puzzled archaeologists and geologists for centuries.

To-day, where once Sodom and Gomorrah stood, where David took refuge, where Herod and Mariamne fled when the Parthians captured Jerusalem in 42 B.C., modern science is taking out potash and bromine—the Dead Sea area is alive with activity.

Once barren and thought useless, the sea's shoreline is now ringing with the sound of hammers as a new potash works, with a 39,000-ton capacity annually, has brought on a building boom.

Reared up by British capital, in and around the Dead Sea, are bringing thousands of visitors to the sea each winter, and homes and work buildings are springing up.

Great Britain is closely watching the potash processes, for the Dead Sea is a great source of potash and bromine for various uses.

By contrast to ordinary ocean water, which contains from four to six per cent. salt, the Dead Sea contains 25 per cent. No animal life is able to live in its waters, and very little vegetable life.

The evaporation from the sea, its only outlet from the heavy inflow, causes a "strange-looking" blue-white clouds to float overhead, giving it a fantastic sheen from a distance.

## The Cattle Know

An interesting little ceremony takes place every summer evening in an English town near Berwick-on-Tweed. A lad blows a horn on the village green at Church Yetholm, whereupon all the cattle from all the grazing lands around the town saunter home unattended. Each knows its own farm and barn and walks straight into them.

The African Alpine swift, during the course of a morning's feeding, often wanders 80 miles or more from its nightly roosting place.

Many Americans visited Belgium last year.

## Here's more help to PREVENT MANY COLDS

At The First Sneeze, sniffle, or any irritation in your nose

Quick! A Few Drops of Vicks Vapo-Rol up each nostril

It's s-p-r-e-a-d-s through nose and upper throat—where 3 out of 4 colds start.

You can feel the tingle as Vapo-Rol s-p-r-e-a-d-s through the trouble zone in your nose and upper throat. Vapo-Rol is specially designed to stimulate Nature's defenses in this area. Used in time, Vapo-Rol helps to prevent many a miserable cold from developing... and to throw off head colds in the early stages.

Quickly relieves "Stuffy Head"

VICKS VAPO-ROL

## Little Helps For This Week

I will hear what God the Lord will speak; for He will speak peace unto His people. Psalm 85:8.

There is a voice, a still small voice of love, Heard from above; But amidst the din of earthly sounds;

By those withdrawn apart it best is heard, And peace is breathed from every gentle word.

## Necessity For Defence

Must Take Necessary Steps To Safeguard Our Heritage

"We are living in a fool's paradise if we think we can occupy half a continent, rich in vast resources, with only 10,000,000 people without our requiring sufficient physical protection to safeguard our heritage."

Col. Harry S. Hamilton, K.C., Liberal M.P. for Algoma, Ont., told a local service club at Sault Ste. Marie as he urged the necessity of Canada protecting herself in an "expansion mad" world.

Canada needs a better defence policy and Canadian people must be awakened to this necessity, declared Col. Hamilton, first member of the Canadian expeditionary forces to be wounded in the Great War.

Water freezes every night of the year at Alto Curcerim in Bolivia, while at noon the sun is hot enough to blister the skin.

New regular aircraft services of British railways are adding 11,000 miles weekly.

## QUIVERING NERVES

When you are just on edge... when you can't stand the children's noise... when everything you do is a burden... when you are irritable and blue... try Lydia E. Pinkham's Vegetable Compound. 98 out of 100 women report benefit.

It will give you just the extra energy you need. Life will seem worth living again.

Don't endure another day without the help this medicine can give. Get a bottle from your druggist today.

### Ether Waves

By Omar

### TRUE FACTS YOU SHOULD KNOW ABOUT SHORT-WAVE RECEPTION

Generally speaking, short-wave broadcasters are assigned to one of four main sections of the dial, known as the "19 meter," "25 meter," "31 meter," and "49 meter" bands. On both sides of these bands and filling the space between them are the commercial radiophone and radio-telegraph stations, amateurs who talk by both code and voice, and the aeroplanes which get their orders and weather reports from headquarters.

There are so many short-wave broadcasters and so few available places for them that the stations necessarily are close together. Exceedingly fine tuning is therefore required in order to select one particular programme from the many that cluster about it. Often a movement of the dial so slight as to be scarcely noticeable tunes one station out and another one in. The cleverest users of all-wave receivers eventually develop a knack of slicing the desired station from those adjacent to it. With modern receivers, short-wave tuning is made easier through the use of a vernier control with a reduction of 55 to 1, thus making it possible to tune sharply with ease . . . a most important requirement in a short-wave receiver. In addition to the foregoing, to secure the ultimate in short-wave reception it is necessary to make certain that the receiver is installed perfectly and a satisfactory antenna used. You may have the best radio made, yet, if you have not an efficient antenna, you will not get the best results. To insure the most efficient performance of an all-wave radio, the new scientifically designed all-wave antenna should be used. This antenna is ideal for all-wave reception, increasing by as much as five times the signal pick-up of an ordinary antenna. In addition to the antenna itself, the system includes a single transmission line which eliminates noise pick-up between the antenna and receiver, also a coupling transformer located at the receiver which matches the transmission line to the input circuit of the receiver. A low capacity switch on the transformer is provided to switch the system from standard reception to short-wave, allowing maximum efficiency on both wave

### District Echoes

Miss Margaret Cameron has returned from hospital, convalescing at her home.

Meet Jack and George on Armistice Night.

Mrs. Alfred Stevens spent the weekend at Red Deer, the guest of Miss E. Matheson.

George Lim and Evan Gordon took in the opening of the Calgary Ice Arena Friday night.

Miss T. Grant, of Calgary, was the guest of Miss Florence Cruickshank over the weekend.

Corp. Cameron, Mrs. Cameron and Miss Anne, journeyed to Calgary Friday, bringing back with them, from hospital, Miss Margaret

A delegation of the local Board of Trade were visitors to Drumheller Wednesday, the guests of the Drumheller Board.

I'm Jack! I'm George!  
The attention of our Readers is directed to the "Notice" regarding the observation of Armistice Day, by Stores and Places of Business.

We draw to the notice of the teaching faculty of the district, the special article this week by L. W. Brookington. It will be found in the High School Corner.

### CARD OF THANKS

I desire, on behalf of myself and family, to express our sincere thanks for all the kindnesses extended to Mr. Fred Stevens during his illness, and also for the many expressions of sympathy received by us since our very sad bereavement.  
(Mrs.) MARY STEVENS.

10 cards with envelopes as low as . . . \$1.25

### Edlund's Drug Store

THE REXALL STORE

Phone 3.

By increasing the signal strength and reducing interference to a minimum, the all-wave antenna offers greatly improved reception on all bands. Installation is easy and convenient, standard antenna wire is supplied in exact lengths lined at proper points for soldering. The transmission line supplied is light and does not require heavy transposition blocks. A special cross-over insulator and other necessary insulators are supplied with the antenna kit.

## Activities of Societies Etc.

### FLORAL U.F.W.A.

The usual monthly meeting of the Floral Local U.F.W.A. will be held November 18 (a week later than usual) at the home of Mrs. Orvil Bills.

### Roll Call

CURRENT EVENTS

### WOMEN'S GUILD

Keep November 28th open and visit our Bazaar. Further particulars later.

### CURLING CLUB

The exponents of the Caledonian Game "Wi Besom an Stane" will please convene at the Oliver Cafe, Monday night, November 9, at 8 p.m.

Report of the Officers will be given for 35-36 and such other business transacted as may be necessary.

### DRAMATIC SOCIETY

We take this opportunity of thanking the Balmis Grocery for the assistance and patronage given us on the night of the Amateur contest, by way of advertising. His name being also omitted from those published. (Come in some time, C.D.S. Script, and we will give you some tips on reporting. Ahem! Editor.)

### VALLEY OF THE SHADOW

By John Galsworthy

GOD, I am traveling out to death's sea,  
I, who exulted in sunshine and laughter,  
Thought not of dying—death is such waste of me!  
Grant me one prayer: Doom not the hereafter  
Of mankind to war, as though I had died not—

I, who in battle, my comrade's arm linking  
Shouted and sang—life in my pulses hot,  
Throbbing and dancing! Let not my sinking  
In dark be for naught, my death a vain thing!

God, let me know it the end of man's fever!  
Make my last breath a bugle call, carrying  
Peace o'er the valleys and cold hills forever!

### IN MEMORIAM

By Lexie Dean Robertson

WHEN I see a tall boy  
Walking down the street,  
I always think of my lad  
With his dancing feet.  
When I hear a bugle  
Sounding sweet and clear,  
An old remembered pain  
Clutches me with fear.

WHEN I lay a garland  
On his grassy mound,  
I can hear the noise of war  
Though there is no sound.  
When I kneel a moment  
By that precious sod,  
Let no other lad come here—  
Thus I plead with God.
